

Summary

- I am a Product & Technology Professional passionate about using technology to scale businesses and drive revenue growth. I have a strong background in end-to-end product development across web and mobile platforms, with deep experience in SaaS and Fintech ecosystems.
- I specialize in building scalable, user-centric products, leading full-stack architectures, and solving complex challenges in event-driven and distributed systems. I've successfully guided products and startups from idea to market-ready platforms, ensuring reliability, performance, and great user experience.
- As a people leader, I enjoy mentoring and growing engineering teams, fostering collaboration, innovation, and delivery excellence. I also actively drive R&D initiatives, always exploring emerging technologies to build future-ready solutions.
- Proven expertise in building secure, high-performance SaaS products including digital lending platforms, payment gateways, and credit decisioning engines.
- Proficient in MERN and LAMP stacks, with hands-on experience in MySQL, Python,Node.js, React.js, Next.js, and modern web technologies.
- Skilled in scalable backend systems, intuitive frontends, RESTful APIs, and cloud-native architectures on AWS/GCP.
- Experienced in microservices, Agile/Scrum delivery, and aligning tech strategy with business goals.
- Passionate about engineering excellence, team leadership, and driving digital transformation in financial services.
- Experience In designing loosely coupled, Secured Micro Service Architecture that can support millions of Android and IOS mobile application like EX: KBC Program , Indian Idol, for Sony Picture Network
- Experience In Relevance Searching, distributed algorithms, advanced data structures, high-volume data processing and statistics using open source Framework
- Experience in Designing and Developing in Application Security, Entertainment media, Health-care applications, Financial application , Social networking Applications , Monitoring applications and Marketing and Asset Management Applications

Technical Skills

- **Languages:** Node.JS, Python, PHP, JavaScript
 - **Frameworks:** CodeIgniter, Zend, Laravel, Node.JS, Sails JS, Express JS React JS, Vue JS
- **Cloud:** AWS (S3, EC2, Auto Scaling, Lambda, EKS, RDS,Load Balancer, Route 53, Lambda, IAM, DynamoDB)
 - **Web Technologies:** HTML, JavaScript, Ajax, jQuery
- **Databases:** MySQL, Apache Solr, MongoDB, Redis
 - **Tools:** Data Scraping from other Websites, RabbitMQ, SQS

Work Experience

Decimal Technologies Private Limited	<i>Formerly Opendoors Fintech (Namaste Credit) and Acquired by Decimal Technologies</i>
Manager - Technology	<i>Dec 2019 - Present</i> <i>Bengaluru, Karnataka</i>
<ul style="list-style-type: none">• Product & Platform Architecture: Own end-to-end architecture of a SaaS lending platform on AWS, covering LOS, LMS, BRE, and Collections, with a focus on scalability, availability, and reliability.• AWS Cloud Architecture: Design cloud-native solutions using VPC, EC2, ECS/EKS, RDS/Aurora, S3, Lambda, API Gateway, SQS/SNS, and CloudWatch, optimizing cost, performance, and resilience.• Security & Audit Compliance: Lead security-first architectures aligned with ISO 27001, SOC 2, RBI, and PCI-DSS, including IAM, encryption, audit logging, and access controls.• Business & Customer Requirement Analysis: Work closely with customers and stakeholders to analyze business needs, pain points, and regulatory constraints, translating them into secure, scalable solution designs.• Solution Design & Customization: Develop target-state architectures, integrations, and customization strategies by mapping customer requirements to product capabilities while minimizing technical debt.• Architecture Governance & Prioritization: Partner with product managers and engineering leaders to prioritize requirements based on business impact, feasibility, security, and roadmap alignment. Actively participate in backlog grooming and sprint planning.• Technical Leadership & Agile Delivery: Lead technical analysis, break projects into modules, and assign tasks using Agile methodologies and JIRA. Guide teams through design, prototyping, development, and execution.• Delivery Oversight: Track milestones, manage dependencies, and ensure on-time delivery by supporting teams and resolving risks proactively.• Issue Resolution & Mentorship: Resolve complex technical issues escalated by junior and mid-level developers, providing guidance and mentoring to strengthen team capability.• Cross-Functional Collaboration: Collaborate with CTO, Product, Design, Testing, DevOps, and Optimization teams to evaluate technologies, review designs, and recommend improvements.• Documentation & Design Artifacts: Create clear architecture diagrams, solution designs, functional specifications, process flows, and security documentation for internal teams and customers.• Stakeholder Communication: Act as the architectural and technical bridge between customers, engineering, implementation, security, and support teams, ensuring alignment throughout delivery and onboarding.• Project & Onboarding Management: Manage multiple client onboarding projects simultaneously, preparing project plans, monitoring progress, and coordinating regular status reviews.• Enablement, Training & Audit Readiness: Conduct architecture walkthroughs, customer training sessions, and workshops, supporting audit readiness and compliance evidence preparation.	
Sourcebits Technologies (P) Ltd	<i>Aug 2018 - Dec 2019</i>
Bengaluru, Karnataka Associate Tech Lead Project: Sony EMS PlatForm	
Project Description: KBC,TKSS,INDIAN IDOL,VOTING and Quiz SYSTEM SERVICES	
Key Responsibilities: <ul style="list-style-type: none">• Take responsibility of end to end applications and work with team• Developed a generic application system that could be reused in any program, ensuring scalability and flexibility.• Conducted code reviews, focusing on optimizing performance for millions of users.• Implemented real-time communication with online users through socket connections.• Designed and implemented the flow for publishing questions, collecting responses, and displaying results.• Developed the system to calculate real-time earned points for users based on their interactions.• Integrated sponsor-provided reward items based on earned points.• Managed multiple concurrent events to enhance user entertainment during the show.• Developed a system to display user statistics, including graphs based on program participation.	
Project: PriceRaja	
Project Description: Product Comparison with Best Deals (Price,Feature,Reviews,Specifications)	
Key Responsibilities: <ul style="list-style-type: none">• Worked on Admin Panel & CMS Management• Development of Forum based Content Management System• Worked on Apache Solr for filter data from database• Extensively worked on integration of social media tools like Facebook,Twitter,Linkedin & Google+• Troubleshooting & resolution of issues like optimisation, technical,performance & security in the website• Integration of Gallery, Review – Rating, Have a Question functionalities.• Worked on Alternatives, Specifications, Price Alert set, In stock alert set & Launch Alert Set• Worked on Deals, Coupons & Users Module	
Bliss Inns Pvt Ltd	<i>July 2016 - Aug 2018</i>
Noida, UP Senior PHP Developer	
Accentium Web Pvt Ltd	<i>Aug 2014 - July 2016</i>
Gurgaon, Haryana Software Engineer	
Indian Holiday Pvt Ltd	<i>Dec 2013 - July 2014</i>
New Delhi PHP Developer	
Webixion Technology	<i>July 2012 - Dec 2013</i>
PHP Developer
